4\textsuperscript{th} September 2012

Dear Parents/Guardians

Head lice are common amongst children and remain the parent’s responsibility to manage. In support of parents, the school may conduct head lice inspections throughout the year.

You were asked at the commencement of the school year to sign a permission form allowing your child/ren to be inspected by our nominated staff members for the presence of head lice.

In accordance with the school’s Head Lice Policy, we wish to advise that we intend to undertake an inspection on \textbf{Thursday 6\textsuperscript{th} September 2012} and \textbf{Friday 7\textsuperscript{th} September 2012}.

Only students whose parents have returned the permission form and provided consent will be inspected. It should be noted that all students may be visually checked (no touching) for head lice irrespective of whether or not this consent form for a physical inspection has been completed and returned.

All students will be provided with a confidential report indicating to parents the results of the inspection.

A copy of the school’s Head Lice Policy is available at the Office.

Please find attached a document titled ‘Treating and Controlling Head lice’, which has been prepared by the Department of Health.

Regards

Allan Armstrong
Principal
