Curriculum Day Friday
On Friday Cardinia Primary School conducted its Curriculum Day for Term 2. The day was extremely productive, with each of our Professional Learning Teams (VCOP, Reading, Spelling and Maths) presenting to the whole staff, sharing resources and discussing the work they have been doing so far this year in their particular area of interest. It was fantastic to see the professional manner in which staff presented and the quality of their materials and understanding of the work they have completed. Staff from each group also sought feedback from grades about their initiatives and discussed the next steps in their work for the remainder of the year.
A huge congratulations to all staff members for the invaluable PD they helped construct and present on Friday. It was a real credit to each and every one of them.

The Junior School Council has set a challenge for the Cardinia Primary School Community.

- Have you got a container at home full of saved up silver coins that are annoyingly sitting there until you sort them out or take them to the bank?

- Are you sick of carrying around your wallet or purse full of heavy silver coins that weigh your pocket or handbag down?

Well let’s put those coins in the Junior School Council Bucket Challenge. Our aim is to fill two buckets to the top and see if we can collect enough silver coins to weigh the same as Mr White. Money raised will be used for our school fete happening later in the year.

*Donations are still coming in and so far we have a total of approximately 16 kgs in silver coins, which is a GREAT effort! Donations can be left at the office.*

Nephritic Syndrome Fundraiser
One of our students, Kobey V in Foundation was diagnosed with Nephritic Syndrome in 2013 aged 3.

Nephritic Syndrome is a kidney disorder which causes large amounts of protein to be lost in the urine leading to low levels of protein in the blood. Normally, protein in the blood prevents water from leaking out of the blood vessels into the tissues. In Nephritic syndrome, low blood protein levels allow water to leak into the tissues which become swollen. This swelling is called oedema. All body tissues swell but the most obvious sites are the abdomen, the legs, the face and groin.

To raise funds for both awareness and research into Nephritic Syndrome, a fundraiser has been organised for Saturday 8th October at Peninsula Obstacle Course in Moorooduc. This event is an Obstacle Course/Mud Run and further details are in the following pages of this week’s Newsletter. If you are unable to attend this event but would like to donate you can via the link below. All donations over $2 are tax deductible. Monies raised will go directly to the Monash Children’s Hospital Renal team in the Nephritic division. Please support this event.
